

4/20/99

Dear Commissioner Henney:

As a consumer, I want the right & ability to choose not to eat genetically engineered food. I consider genetic alterations to be a grave potential danger to human health and the ^{02:41}outer environment.

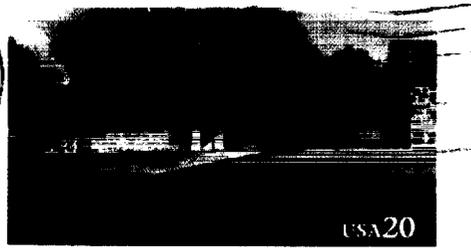

I support the demands made in the lawsuit against FDA which ask for safety testing & prominent labeling. I do wish you would get out front of this issue to provide the public with protection and information.

Sincerely,
Margaret M. Bride
